PARTICIPANTS NEEDED

AUTISM & VIRTUAL REALITY

Focus Groups Related to Autism Research Project

Our research team is investigating how autism can be better understood through the use of virtual reality (VR).

We are recruiting individuals with a diagnosis of autism or Asperger’s to participate in a focus group. Individuals will be discussing topics and answering questions to help our team design a virtual reality simulation. Virtual participants will earn $20 an hour (up to $30 total for 1.5 hours). Alternatively, participants can choose to participate through online survey only and for this will earn $15 (estimated 30-45 minutes).
